

PROFESSIONAL SUMMARY

Senior Software Engineer with 7+ years of experience specializing in **healthcare technology (EHR/FHIR)** and scalable backend architecture. Proven expert in implementing **FHIR standards** to support **CMS’s** innovation models (EOM & GUIDE). Proven expertise in building modular component libraries, designing microservices on AWS, and developing accessible, responsive user interfaces using modern frameworks including React, Angular, Lit, with a track record of improving development velocity by 15%, and delivering 30+ reusable components.

SKILLS

- **Languages:** TypeScript, JavaScript, Java, Python, HTML, CSS, JSON, C#, .NET Core, SwiftUI
- **Databases:** MS SQL Server, MongoDB, PostgreSQL
- **Cloud:** Supabase, Lambda, S3, Step Functions, EKS, API Gateway, EC2, Glue, CloudWatch, SNS, Splunk, Secrets Manager
- **Frontend Framework/Tools:** Next.js, React, GitHub CoPilot, Lit, Storybook, Tailwind CSS, Bootstrap, Angular, FHIR, Figma, FastAPI, RAG, VS Code, GitHub CoPilot, Gitlab Duo, Visual Studio, IntelliJ, Postman, Crystal Reports, Git

EMPLOYMENT

Senior Software Engineer – Full Stack ICF Feb 2026 – Present

- Modernizing a **NCI** biospecimen research database by migrating legacy systems to a **Next.js and Postgres** stack on **AWS EC2**, utilizing **USWDS** components to ensure 100% federal accessibility compliance and a 40% boost in page performance.
- Accelerated development cycles by 35% through the strategic use of **GitHub Copilot** and leveraged **3 Datadog certifications** to build advanced observability dashboards, strengthening the monitoring partnership
- Next.js • Postgres • AWS EC2 • USWDS • Datadog

Software Engineer - Contract M&T Bank (TEKSystems) Oct 2024 – Feb 2026

- Developed **large-scale, modular front-end architecture** component library using **Lit, TypeScript**, and **SCSS**, delivering 30+ reusable components and improving UI consistency across 10+ product teams
- Built **responsive and accessible UI web components** aligned with **WCAG and inclusive design standards**, including **ARIA** patterns and support for **keyboard and screen-reader** interactions
- Automated component file creation and boilerplate setup, reducing manual effort to develop new components
- Integrated components into a **centralized design system**, leveraging **Storybook** for documentation and developer onboarding, and contributing to component standards, UI patterns, and design tokens
- Partnered with **Design and UX teams** to translate Figma prototypes into production-ready interfaces using **Figma Code Connect** and collaborative design reviews
- Leveraged **LLMs** (Gitlab Duo) to accelerate component development and automated test generation, improving development velocity by ~15% and reducing cycle time.
- Developing a chrome extension to identify and detect design system component on a web page to measure adoption in the product application
- Implemented **unit and end-to-end test coverage** using **Playwright**, improving component reliability and reducing regression defects across consuming applications

Senior Software Engineer - Backend ICF Jul 2023 – Oct 2024

- **FHIR Microservices:** Developed AWS-based data processing microservices for patient records to support healthcare payment models outlined by the **CMS Innovation Center**.
- **API Design:** Built REST APIs in API Gateway for **FHIR resource submission** and status polling, integrating seamlessly with **Firely Server** for resource validation
- **FHIR Optimization:** Analyzed and tested **150,000 FHIR records** to optimize AWS Lambda performance, reducing throttling and improving data ingestion concurrency
- **Workflow Automation:** Implemented event-based Lambda functions to trigger Step Function workflows for large-scale healthcare data processing
- **Observability:** Created Splunk dashboards to monitor metrics and health checks for FHIR-related data pipelines
- Performed code reviews and provided feedback on naming conventions, best practices, and code reusability.

Software Engineer MatrixCare Aug 2018 – June 2023

- Developed and integrated features like Medication Reconciliation and reporting capabilities into the Orders module of the SNF **EHR** platform which led to remarkable **50% increase** in efficiency during patient re-admissions
- Integrated **Labsoft** with SNF systems, enhancing features and supporting new **HL7** fields and updating existing routes within **Rhapsody** Integration Engine to streamline data exchange and improve operational efficiency

- **Lead two interns** for Authorization POC using **Okta**, **React** and Python Flask framework and deployed on AWS Lambda
- Led Proof-of-concept to adopt **micro-frontend** architecture into monolithic **Java 7/J2EE** Spring MVC web app
- Responsible for enhancing existing **UI features** using JavaScript. Used **Gitlab** for version control
- Provided on-call support and demonstrating a prompt response to urgent issues
- Utilized AWS Comprehend Medical to accurately detect and parse the frequency from a pharmacy-provided instructions
- **Refactored legacy code** incrementally and added JUnit test during feature enhancement
- Developed features by creating components using **Angular**, classes and interface using **Typescript** & integrated RESTful APIs to extract data from SQL Server using **stored procedures**
- Experience writing stored procedures in T-SQL on Microsoft **SQL Server** and optimized sub tree cost using execution plans
- Developed highly **reusable** template-driven Angular form components, services, directives and pipes within application
- Built responsive, interactive applications using Angular **Bootstrap** and angular-datatables libraries
- Worked on **storybook** to create HTML, **Angular Web components** from **Figma** design for sharing across different products
- Actively participated in **Agile** development methodologies, including daily stand-ups and sprint planning
- Implemented stored procedures in SQL for data input to reporting tools and developed reports using SAP Crystal Reports
- Closely worked with senior engineers to optimize existing UI layouts and simplified the workflow for end users
- Provided technical recommendations to the UX team to create a streamlined, user-friendly interface

Software Engineer

iGATE (now Capgemini)

Nov 2013 – Jun 2015

- Documented test cases and performed testing for quality assurance and used PL/SQL developer tools
- Implemented and tested Oracle Applications R12 Financial modules like AP, AR, PO, INV, SLA
- Involved in end-to-end requirement analysis, data conversion management, and testing

EDUCATION

Rochester Institute of Technology, M.S., Computer Science. GPA: 3.46

Aug 2015 – Aug 2018

University of Mumbai, B.E., Information Technology GPA: 3.4

Aug 2009 – May 2013

PROJECTS

- [HL7-FHIR Mapping Agent](#) | Jan 2026 | An AI agent uses RAG for transforming legacy healthcare data formats (HL7v2 and C-CDA) into FHIR R4. Tech Stack: Python, FastAPI, LangChain, RAG
- [TipEasy](#) | Feb 2025 | Developed and published a SwiftUI tip calculator iOS app that simplifies calculating tips
- [MemoCardFlip](#) | Feb 2025 | Developed a memory card flip game for Apple Vision Pro
- [Portfolio Website](#) | Mar 2023 | Created a portfolio website using react and deployed it on **github** pages
- [Alexa in Mixed Reality \(Capstone\)](#) | Dec 2017 | Interact with Alexa's hologram developed using Unity3D and using IBM's Tone Analyzer analyzed headlines tones fed from News API

CERTIFICATIONS

- [Datadog Fundamentals](#) | Datadog | Apr 2026
- [APM & Distributed Tracking Fundamentals](#) | Datadog | Apr 2026
- [HL7 FHIR Proficiency Exam Prep Course](#) | HL7 | **Apr 2024**
- [Microsoft Certified Azure AI Fundamentals](#) | Microsoft | **Feb 2024**
- [AWS Certified Data Engineer – Associate](#) | Amazon Web Services | **Dec 2023**
- [AWS Certified Solutions Architect - Associate](#) | Amazon Web Services | **Oct 2023**
- [AWS Certified Developer - Associate](#) | Amazon Web Services | **May 2023**

PATENTS
